

# FATIGUE, NAUSEA & HEADACHES

## Key points

- These symptoms can be linked with cramps, hormone changes, heavy bleeding, poor sleep, dehydration, or anemia.
- Repeated fatigue with heavy bleeding deserves more than a shrug.
- If headaches, nausea, or fatigue are getting worse, the pattern should be reviewed.

## When to seek care

- Fatigue with fainting or shortness of breath
- Vomiting, dehydration, or severe headaches
- Symptoms that are intense and repetitive every cycle

## Suggested Actions

- Track timing, severity, and associated bleeding
- Notice whether symptoms improve after the period starts
- Seek care for worsening or disabling patterns

## Key Takeaway

Recurring symptoms should be tracked and evaluated over time.
